

Lleida

January 25-27, 2023

***TANGO-Circular** project partners met in Spain in Lleida on 25, 26 and 27 of January 2023, for the second technical meeting of the Project. During the meeting they discussed its progress, presented Deliverables completed so far, and planned the activities to be conducted until the next meeting that will be held on 3-5 of July 2023 in Evora (Portugal)*

2nd Project Technical Meeting Lleida January 25-27, 2023

The meeting, organized and hosted by the University of Lleida, consisted of three days during which technical visits were also made at analyzing best practices examples of circular bioeconomy in agriculture.

The Partnership of TANGO_Circular

The first visit was held at a composting plant set up by the livestock farmers' association Alcarràs Bioproductors (Vallmanya) in the Segrià region (Catalonia). An innovative plant in the livestock sector,

as it mixes waste from livestock farms (manure and slurry from cattle and pig farms) with agricultural plant waste to obtain organic fertilizers, as an alternative to chemical

ones that damage the ecosystem. The goal is to promote the circular bioeconomy by adding value to this waste, turning it into a new resource.
